1 Introduction

This section is written after Phase 1. Nothing here is a result yet.

2 The record and the three regressor sets

This section is written after Phase 1. Nothing here is a result yet.

3 Method

This section is written after Phase 1. Nothing here is a result yet.

4 Trend

This section is written after Phase 2. Nothing here is a result yet.

5 Seasonality

This section is written after Phase 1b, completed after Phase 2. Nothing here is a result yet.

6 Regressors and gains

This section is written after Phase 2. Nothing here is a result yet.

7 Impulse response

This section is written after Phase 4. Nothing here is a result yet.

8 Uncertainty and validation

This section is written after Phase 3. Nothing here is a result yet.

9 What the wall temperature and the pyranometer buy

This section is written after Phase 2b. Nothing here is a result yet.

10 The monitor

This section is written after Phase 5. Nothing here is a result yet.

11 Outages as hypotheses

This section is written after Phase 6. Nothing here is a result yet.

12 Verdict

This section is written after Phase 7. Nothing here is a result yet.

13 Limitations

This section is written after Phase 7. Nothing here is a result yet.

14 Run metadata

This section is written after Phase 7. Nothing here is a result yet.
